Ingredients: 100% natural passion fruit

Type: frozen/juice

Taste: natural sweet

Shelf life: 24 months

Storage: -18c

Pasteurized

Packing: PE Bag 20kg, customer's request.

AGRO PRODUCTS

SPLIT CASSIA CIGARETTE CASSIA

Specifications:

Moisture: 13,5% max

Admixture: 1% max

Length: 25 – 45cm (80% min)

No fungus, yellow/reddish color

Packing: cartons (net 10kg)

ANIMAL FEED

CORN SILAGE

Currently, Corn is widely used in livestock production due to its high nutritional content, high starch content and dry protein content of up to 4%DM. Corn is a corn plant that is harvested whole, about 90 days, with green leaves, containing the most nutrients.

The main products from corn are corn silage, dried and pelleted (easy to transport).

PINEAPPLE PEEL SILAGE

Pineapple peel is an agricultural by-product in the processing of canned pineapple.

Pineapple peel has high nutritional content, suitable for most types of cattle such as cows, buffaloes, goats, sheep...

The main products from pineapple peel can be mentioned as silage pineapple peel, dried pineapple peel and pelleted products.

ANIMAL FEED

PINEAPPLE PEEL PELLETS

After cleaning, the pineapple peel is dried, then crushed and pressed into pellets.

The product is packaged in vacuum packaging, ensuring safe transportation and long-term use.

ANIMAL FEED

FERMENTED SUGARCANE BAGASSE

Dried bagasse is obtained in abundance in the sugar industry.

Dried bagasse has a limited nutritional content, but due to the residual sugar in bagasse, it is easy to ferment when stored.

Bagasse after fermentation is very good for the digestive system of animals, so it is often used widely.

The main products from bagasse being distributed today are bagasse pellets and fermented bagasse (black bagasse).

BAGASSE PELLETS

Bagasse after sugar production, It is dried and pressed into pellets.

Sugarcane bagasse pellets are widely used in the livestock industry as bedding material.

It is also used as an alternative fuel to firewood.

CORN COB PELLETS

Corn cob is a low-nutrient product, often used for the purposes of mixing with other feeds or mixing floating feed in aquaculture.

In addition, due to its high porosity, corn cob pellets are also used to spread barns and keep livestock warm.

The main products of corn cob are corn cob pellets, corn cob crushed bales.

ANIMAL FEED

CRUSHED CORN COB

After the corn cob is removed, it is dried, crushed, and pressed tightly into blocks.

The blocks are packed in airtight packaging, protected from moisture, and packed into pallets for easy transportation.
